Career Objective

As a Middle Python Backend Developer with strong experience in designing and building high-quality, scalable backend systems, I am motivated to grow professionally and contribute to impactful real-world projects. I thrive in collaborative team environments and consistently seek to improve code quality, architecture, and performance. I am committed to continuous learning, adopting modern technologies, and delivering reliable solutions that bring real value to users and businesses.

Work Experience

Python Backend Instructor

Urgut DEVOPS Developers Academy — May 2025 – Present

- Teaching Python Backend development (Django, DRF, PostgreSQL, Celery, Docker, Redis, etc.).
- Guiding students through building backend systems based on real-world projects.
- Mentoring students in GitHub workflows, Docker, and CI/CD practices.
- Developing structured learning materials and practical test assignments.

Python Backend Mentor

Komiljon Khamidjonov's Online Python Backend Courses — May 2025 – Present

- Reviewing and optimizing students' code.
 - Providing guidance on applying best practices in Django and DRF.
 - Supporting students in gaining hands-on experience with real-world projects.
-

Education

Python Backend Development Bootcamp

Trainer: Komiljon Xamidjonov

- **Technologies:** SQLite, Mysql, PostgreSQL, Redis, Django, DRF, FastAPI, Celery, RabbitMQ, Docker, GitHub Actions, TDD, Django Tests
-

Technical Skills

- **Programming Languages:** Python
 - **Backend:** Django, Django REST Framework (DRF)
 - **Databases:** SQLite, PostgreSQL, Redis
 - **API:** REST API, Telegram Bot API
 - **CI/CD:** GitHub Actions, Docker
 - **Frontend:** HTML, CSS, JavaScript
 - **Testing:** TDD, Django Test Framework
 - **Web Servers:** Nginx (Configuration and Optimization)
 - **Other Technologies:** JWT, Djoser, Django ORM, Django Sessions, Pagination, Filtering, Search, Authentication, SMS Gateway, Caching
-

Project Experience

Online Flight Ticket Website

- **Technologies:** Django, Docker, Celery, Redis, Telegram Bot API, SMS Gateway, Swagger UI
- **Features:** Custom User, Caching, SMS Authentication
- [GitHub: My-ticket_site](#)
- [Vebsayt: onlineaviabilet.uz](https://onlineaviabilet.uz)

AvtoKontinent.uz – Online Auto Parts E-commerce Platform

- **Technologies:** Python, Django, Django REST Framework, HTML, CSS, JavaScript, i18n, Telegram Bot API, Docker, Docker Compose
- **Features:**
 - **Telegram Login:** User authentication via Telegram using Django REST Framework (DRF)
 - **Custom Admin Panel:** Role-based interface (Admin/Staff) with full CRUD operations and real-time updates

- **Product Management:** Products linked with category, brand, and model; includes images, descriptions, and currency support
 - **Order System:** Cart functionality, order creation, and admin-side control over payment and order status
 - **Multilingual Interface:** i18n-based support for Uzbek and Russian languages; ready for translation
 - **Search & Pagination:** Efficient filtering and search over large data sets
 - **User Management:** Comments, content moderation, and user registration analytics
 - **Security:** Session-based auth, CSRF protection, role-based access permissions
 - **Containerization:** Fully Dockerized and ready for deployment using Docker and Docker Compose
- **GitHub:** [AvtoKontinent.uz](https://github.com/AvtoKontinent/uz)

E-commerce Website

- **Technologies:** Django, DRF, Celery, Redis, Telegram Bot API, Swagger UI
- **Features:** Refactoring based on best practices, ensuring security with Dotenv, Telegram bot integration, SMS authentication, Custom User, Caching, and optimization
- **GitHub:** [E-commerce Website](#)

Maxway Online Shopping Website

- **Technologies:** Django, DRF, Docker, Docker-compose, Django Auth, Phone Number Sending, Custom Admin CRM
- **Features:** Working with Docker and Docker-compose, Validation and Django Password Encryption, Filter, Search, and Prepopulated Fields, Admin page customization, Search
- **GitHub:** [Maxway Website](#)

Blog Website

- **Technologies:** Django, Templates, Static Files, Django Auth, Email Sending, Custom Admin CRM
- **Features:** Creating a Model Manager, Admin page customization, Filter, Search, Prepopulated Fields, Generic Views and Comments, Networking (SessionID, CSRF Token monitoring), Validation and Django Password Encryption
- **GitHub:** [Blog Website](#)

Additional Information

- **Uzbek:** Fluent (Native language)
- **Russian:** B2 level
- **English:** In progress, B1 level
